

Recycling in your Room—New Easter 2011

As of **Easter 2011** the college recycling system is changing. We hope the new system will be clearer and more convenient for students.

You will have 2 bins— one for recycling and one for general waste. Please use the guide below to sort your waste between these bins. Your recycling bin will be **emptied by your Bedder** on a Tuesday.

What to put in each bin:

How to Recycle:

CAP – remove any bottle tops, caps, lids, corks or seals

WASH – make sure there are no smelly residues in your waste

SQUASH – crush down your waste to take up minimum space in the bins.

3 Reasons to recycle:

RESOURCES – used materials are used to make resources, so there is no need to extract fresh natural resources

ENERGY – making products from raw materials uses far more energy

POLLUTION – extracting and processing raw materials creates air and water pollution

If you have any questions please contact green@ecs.u.org.uk
